## Tech Innovators Family Circle (TIFC) Café Twin Pre-Proposal

### Pre-proposal Virtual Teaming Protocol

## Café Twin Virtual Team At Fairfax VA Metro DC Hub

TIFC Café Twin is a virtual team pre-proposal. A multi discipline team of interested and skilled persons are assembled who are located within the Fairfax VA Metro DC Hub to agree to enable and fine tune a preproposal for a crowdfunding or other foundation grant source identified and execute submission. Once successfully submitted, then the virtual team members get paid according to the proposal plan agreed and developed by the team members, typically 3 to 5 persons, each with a designated task within the team per plan.

As an example, Avi's new one man company, QL Group LLC (registered with U.S.govie as small biz and also with State of VA) is now developing this "virtual team" concept to submit several U.S govie SBIR RFP opportunities identified for educational music video games as an example in late 2013 and early 2014 time frame. .

Please search internet on following published topic for additional clarity on SBIR:

**Start Or Expand A Technical Business with A Federal SBIR Grant Phase I with a Innovation Team**

Any indies located in DC Hub, skilled in music or science topics, interested in participating in the SBIR Pre-Proosal are welcome to share ideas for SBIR preproposal for technology development or educational music video DVD or games under the QL Group LLC umbrella or another credible umbrella located at Fairfax VA Metro DC Hub community.

## Example : TIFC Café Twin Virtual Team Pre-Propoal:

In order to execute TIFC Cafe Twin, Kick Starter submitted proposal is asking for \$10,000 for one year project with one Cafe Twin Show per month and the Space Hub Proposal is asking for \$6000 for one Special Event with 50 community shakers and movers invited to a buffet lunch linked to a Special Music & Educational Event at a convenient Community TV show in Fairfax, VA.

But though both of this philanthropy based proposals are accepted by the respected two crowdfunding source, the requirement for community support is not met.

Avi has started working on getting if possible by discussing with some of the 15 Chamber of Commerce existing in Fairfax and also this one technical association.

However this his task needs some support from a small group of key persons to outreach the Chambers and others in our DC Tech Hub to understand & appreciate the value proposition of TIFC Cafe Twin to help strengthen knowledge economy infrastructure here in Fairfax County VA and our Washington DC tech hub as is logical and supported widely by those who understands the knowledge economy infrastructure building imperative.
